It is all lab data from grab samples. The XRF data was problematic because the rain and water content of the soil interferes with accurate readings.

My guess is the data that have been reported are all lab data as the XRF is unlikely to be able to do hexavalent chromium, but would like to confirm.
Julie

Scott,
Can you answer Julie's question about the soil data please. Thanks.

Are the data that you shared XRF, lab data, or both? Thanks.

Hi Julie,
Sorry for the delay. I will send the air SAP next.
